

PACKAGE UNIT

Minimum space , high efficiency

Packaged energy recovery solutions for comfort applications integrated controls , heat recovery and DX cooling system.

- Optimized foot print and low sound levels
- Easy to open (and to close) housing covers
- Surface reserve on the condenser and evaporator for a reliable operation under production conditions
- No corrosion problems
- No unnecessary high-pressure fault in summer
- Design for indoor / outdoor installation
- Could be designed in two split units or a compact unit
- Rugged bitzer and Danfoss maneurop compressor design
- Programmed microprocessor control system .
- Optional network cards (customer choice)
- Ability of capacity control from %25
- Compatible with any other systems.
- Air Flow Rate start as small as 2100 cfm even smaller and end at over 70000 cfm.
- Hygienic package unit could be designed for clean spaces (Refer to SAYO Hygienic Products catalogue.)

OPTIONAL ACCESSORIES:

Overflow valves & tank , HP/LP pressure gages , flow detector , remote maintenance unit , alternative refrigerant , automatic machine water back feed (water connection required)
